

Highest quality with perfect everyday functionality

Lindstrands new collection for 2022 provides the highest quality and the latest safety technology combined with a modern sporty look. The versatile new collection is developed for even the most challenging conditions and shows once again that Lindstrands has taken the lead in motorcycle clothing market. The most fashionable garments in the collection are the pilot styled softshell jackets **FRISEN** and **FRYKEN** and the **FORSHALT** softshell cargo pants. These functional and stylish garments meet the needs of modern motorcyclists and are all suited perfectly for riding as well as for everyday use when you get off the bike.

FRISEN jacket for men and **FRYKEN jacket for women** are the perfect choice for all fashion-conscious motorcyclists who value style, quality and technical features. These elegant street style jackets are water repellent and have **HI-ART®** reinforcement at the shoulders and elbows. HI-ART® is an extremely resistant fabric that was developed by Lindstrands. It is located in the particularly vulnerable areas and increases the protection against abrasion: HI ART® makes textiles in combination with HI-ART more than 500% stronger than textile alone, and leather no less than 200% stronger. As a proprietary technology, HI-ART® is used exclusively by Lindstrands and its sister brand Halvarssons. Both products are CE certified and have achieved A class according to the EU standard EN 17092 for protective clothing for motorcyclists. The products includes our certified level 1 protectors that have stepless adjustability that makes them fit perfectly for everyone. These can be also supplemented with back protection. Both jackets have an open back for increased ventilation and long connection zipper to the pants.

The new **FORSHALT softshell cargo pants for men** matches perfectly to the **FRISEN** jacket. The new water repellent **FORSHALT** pants combine premium quality with great everyday functionality. Modern design and timeless black colour will be easy to combine with almost any jacket. The pants as well as the jackets have HI ART® reinforcement at hip and knees that makes them extremely durable. The pants are CE certified and have achieved class A according to the EU standard EN 17092 for protective clothing for motorcyclists. The pants include our certified level 1 knee protectors that have stepless adjustability that makes them fit perfectly for everyone!

Lindstrands offers an extensive range of motorcycling garments and accessories. With modern details and sporty appearance, the design is focused on riders who wish to push the limits without compromising on safety and performance. Established in 1891 in Malung, Sweden, Lindstrands began making boots for motorcycle riders back in the 1950s. Through the years Lindstrands has evolved into a strong brand whose collection represents the latest technology, innovative and high-quality textiles combined with stylish urban look. As they say, "If it works in Scandinavia..." For further detailed information on the products and a shop locator please visit: lindstrandsmc.com
