Highly ventilated Flow Technology will keep you cool during Summer

Over the years, Lindstrands has achieved a significant position in the motorcycle clothing market by presenting high-quality garments developed for even the most challenging conditions. Lindstrands modern garment technologies ensure a high level of comfort and protection for the rider in all weather conditions including hot summer days. Flow Technology jacket REXBO is developed to keep you cool and comfortable even in warm weather without compromising safety so that you can focus on enjoying the freedom and warmth of summer rides.

The highly ventilated **Flow Technology REXBO mesh jacket** is developed to keep you cool even in warm weather riding. Thanks to the flow technology, the air flows smoothly through the jacket keeping the temperature inside the jacket perfect, so you can always feel comfortable and don't have to sweat. The sun does not shine every day and there can always be rainy days or sudden summer showers. With REXBO you don't have to worry about weather variation, as one of the best features of the jacket is the the detachable waterproof Dryway+ functional membrane that can be used inside or outside of the jacket. Dryway+ ensures full wind and waterproofness and will keep you dry even in wettest and windiest weather. The material allows moisture vapor to escape from the inside while keeping wind and rain out. Also the hood is removable so you can easily detach it and wear Rexbo any way you want.

Safety through comfort has always been the most important part of the product development of Lindstrands motorcycling garments throughout the brand's history. The more comfortable the clothes feel the better the rider can focus on the essential - riding! Needless to say, safety is also a priority when it comes to summer riding. The breathable and light Lindstrands REXBO jacket also guarantees first-class safety. The jacket is CE certified and has achieved AA class according to the EU standard EN 17092 for protective clothing for motorcyclists. The product includes our certified level 1 protectors that have stepless adjustability that makes them fit perfectly for everyone and can be also supplemented with back protection. The jacket has an open back for increased ventilation and long connection zipper so you can zip jacket conveniently with all Lindstrands pants.

REXBO jacket also has **HI-ART®** reinforcement at the shoulders and elbows. HI-ART® is an extremely resistant fabric that was developed by Lindstrands. HI-ART® in combination with a textile is more than 500% stronger than textile alone, and leather no less than 200% stronger. As a proprietary technology, HI-ART® is used exclusively by Lindstrands and its sister brand Halvarssons.

Lindstrands offers an extensive range of motorcycling garments and accessories. With modern details and sporty appearance, the design is focused on riders who wish to push the limits without compromising on safety and performance. Established in 1891 in Malung, Sweden, Lindstrands began making boots for motorcycle riders back in the 1950s. Through the years Lindstrands has evolved into a strong brand whose collection represents the latest technology, innovative and high-quality textiles combined with stylish urban look. As they say, "If it works in Scandinavia…" For further detailed information on the products and a shop locator please visit: lindstrandsmc.com
